ABOUT

I am 25 years old, living in Kiev.

I confidently develop modern web resources on the actual stack, with clean and maintainable code.

I dream to learn to write code in my sleep.

PROJECTS I'M PROUD OF

www.once.agency
Stack: HTML5, CSS3 (SCSS), JavaScript, Wordpress, Git, Figma

A large-scale corporate website for a design studio - from structure to final optimization.
The site includes multiple pages, a blog with dynamic pagination and filtering, and several separate post types for projects.
Implemented:
 - complex scrolling animations;
 - adaptive grid and interactive UI elements with multiple component variations;
 - custom blocks in the admin area with ACF for easy content editing by the client.
Special attention was paid to performance: despite heavy visual content and animations, the site scores 90-100 points in Google PageSpeed on desktop and mobile.

www.afro-dance-tour.com
Stack: HTML5, CSS3, JavaScript, Wordpress, Figma, PHP

Website for a dance studio with the ability to purchase and take courses online.
Connected and customized payment system, restricted access to content, personal account with progress and a convenient admin to manage lessons.
The site is adaptive, with modern design and optimized loading speed.

www.vladyslav-dubin.in
Stack: HTML5, CSS3 (SCSS), JavaScript, React

Developed a modern portfolio website with animations and interactive elements.
The site presents my projects, emphasizing UX/UI: smooth transitions, dynamic blocks, responsive design.
